

Guardian Blast

- Protects appliances and fixtures from staining
- Low cost - Requires only periodic backwashing
- No Filters to change
- Long material life expectancy
- High iron removal efficiency
- Ozone reduces hydrogen sulfide (rotten egg odor) by converting it into a harmless sulfur byproduct
- Ozone oxidizes bacteria and iron solids
- Ozone kills water-borne organics and keeps system clean and free from iron
- Ozone removes the need for chemical pumps that reduce iron bacteria or sulfate-reducing bacteria

****PUMP OUTPUT MUST MATCH OR EXCEED BACKWASH RATE**

	Tank Size (inches)	Media (cu.ft.)	Media Type	Backwash Flow Rate (gpm)	Service Flow Rate (gpm)
Guardian	10 X 54	1.5	Clinoptilolite	7.5	2.75
Guardian-Carbon	10 X 54	1.5	Cat Carbon	5-3	2.75

**Guardian Blast not to be used with microbiologically unsafe water sources

**Guardian Blast also available in 1.25" systems
